technical details

FOSCARINI

A soft shape made from blown glass, a narrow silhouette that envelops the two light sources and curves towards the wall in the space that separates them. Double is a wall lamp that has become a classic Foscarini item, in the catalogue since 1996. The diffuser's movement is underlined by its glossy surface, through an illusion of elegant reflections. Double diffuses an intense light and projects a band of light onto the wall, upwards and downwards, in relation to the two open sides. The lamp is available in two different colours - white and ivory - allowing it to adapt to several furnishing solutions.
